# WE HAVE TRADE IN ( Metal Trade )

## What is metal trade.

Metal trade refers to the buying and selling of various metals, primarily precious metals like gold and silver, and base metals like copper, nickel, and zinc, within financial markets. It encompasses trading on spot markets, futures contracts, and through exchange-traded funds (ETFs). Metal trading is a form of commodity trading where investors and traders speculate on price movements of these metals, either for investment purposes or to hedge against other risks.

# WE HAVE TRADE IN ( INR Trade )

## What is INR trade.

INR trading is the purchase and sale of the US Dollar against India's Rupee in the foreign exchange market. It includes a currency exchange between these two currencies. To anticipate exchange rate changes and potentially profit from price movements, traders and investors participate in USD INR trading.

# WE HAVE TRADE IN ( Ai Trade )

## What is Ai trade.

AI trading is the use of artificial intelligence technologies like machine learning and natural language processing to analyze market data, identify patterns, and make or automate trading decisions in financial markets. It leverages vast amounts of data, such as historical prices and market sentiment, to identify opportunities, execute trades with speed and precision, and reduce emotional bias in decision-making.

# You Can View Your **Live Trades 24x7**
